Spill Prevention Control and Countermeasure (SPCC) Plans

**Course Description:**
Oil entering a public waterway is a serious concern. To protect our environment and ensure EPA compliance, it is imperative that you become familiar with Spill Prevention, Control, and Countermeasure (SPCC) to determine if this rule applies to you, and if so, the minimum required elements of an SPCC plan.

**Learning Objectives:**
- Describe and identify the applicability of SPCC regulation
- Identify the person who prepares the SPCC plan
- List the minimum SPCC elements
- Identify what is considered oil storage capacity
